Sending the right file

CEFR A2 | Unit 7: Technology | Reading

Read the original text. You may underline evidence and reread as needed.

Name _____ Date _____

TASK: SHARE YOUR POSTER
First, save the poster in your course folder. Give it a clear name. Next, open the class message page and select Attach. Choose your poster file. Wait until its name appears below the message. Finally, add a short note and send it.

Rami follows the instructions, but he sends the wrong file. He notices the error when a partner replies, "This is your timetable." Rami checks the folder carefully and finds the poster. He sends a new message: "Sorry. Please use this poster instead. The earlier file was my timetable."

He keeps his password private. When he later needs help with an upload, he describes the error message without sharing his password or any private account details.

Original Ilmiya practice text. Scenarios and research examples are fictional.
